NOTE: Certain revisions have been made to prior period amounts. Refer to the Notes to the Condensed Financial Statements in our first quarter 2019 Form 10-Q for further detail.

¹⁾ Non-GAAP net income and non-GAAP diluted EPS are supplemental non-GAAP financial measures that InterDigital believes provide investors with important insight into the company's ongoing business performance. A limitation of the utility of non-GAAP net income and non-GAAP diluted EPS is that they do not represent the total net income and diluted EPS of the company for the period. InterDigital defines non-GAAP net income as net income plus share-based compensation, repositioning costs, impairment charges and one time adjustments, non-cash interest expense on the company's outstanding convertible debt, non-cash interest expense associated with our contingent obligation to an affiliate of CPPIB Credit Investments Inc., non-cash interest expense associated with the significant financing components of our existing agreements, the related income tax effect of the preceding items, and adjustments to income taxes. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation from or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles ("GAAP"). These non-GAAP financial measures used by the company may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. Detailed reconciliations of non-GAAP net income to net income and non-GAAP diluted EPS to net income per common share - diluted, or diluted EPS, the most directly comparable GAAP financial measures, are provided above.

²⁾ Partner reimbursements represent full or partial cost reimbursements, arising from the Technicolor acquisition, related to specific activities that benefit our partners which are not already included as reductions to our GAAP operating expenses.

³⁾ "Free cash flow" is a supplemental non-GAAP financial measure that InterDigital believes is helpful in evaluating the company's ability to invest in its business, make strategic acquisitions and fund share repurchases, among other things. A limitation of the utility of free cash flow as a measure of financial performance is that it does not represent the total increase or decrease in the company's cash balance for the period. InterDigital defines "free cash flow" as net cash provided by/(used in) operating activities less purchases of property and equipment, technology licenses and investments in patents. InterDigital's computation of free cash flow might not be comparable to free cash flow reported by other companies. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. A detailed reconciliation of free cash flow to net cash provided by / (used in) operating activities, the most directly comparable GAAP financial measure, is provided above.
